Upcoming Changes

Winter/Spring 2008

Stay informed about road construction that may affect you.

The Utah Department of Transportation is making improvements to Washington Boulevard from 26th Street to 36th Street. Washington Boulevard is one of the main roads for north-south connectivity throughout Weber County. This project is needed to provide safer and more reliable travel along Washington Boulevard.

How will this benefit those who use Washington Blvd?

- Better Traffic Flow
- Better Mobility in and around Intersections
- Better Connectivity to other Streets
- Pavement Improvements
- Drainage Improvements
- Better Overall Safety

To improve the traffic safety along the street and going in and out of businesses, UDOT is considering access modifications along Washington Boulevard. Coordination with property owners is needed before any decisions are made.

The project will mean safer access to adjacent streets and less traffic congestion. Medians will be placed in some locations to provide improved business access and to enhance turn lanes. The road will be resurfaced to remove the severe slope in the pavement.

How can you find out more?

For more information, please join us for a public meeting on Thursday, March 27th. The meeting will allow area business owners and residents to get more information about the project, provide feedback, and ask questions.
